

ResearchGate

For Scientists.

ResearchGate is the largest professional network for scientists and researchers. Our free scientific platform enables members to collaborate with their colleagues and peers worldwide, using numerous features that are unique to ResearchGate. Over 1,000,000 scientists have already signed up.

Topics

ResearchGate makes collaboration easy – our Topics are ideal for scientific exchange and cover a multitude of research disciplines. Members can ask questions, get answers from specialists and share interesting content – be it a publication, link, image or file.

Conferences

It's quick and easy to find the conference you're looking for on ResearchGate. We list conferences from across the globe, and give you the tools to interact with delegates and conference attendees before, during and after the proceedings. You can search for a specific conference or browse by date, discipline and country to discover something new in your area.

18th International Chromosome Conference

Aug 29, 2011 - Sep 2, 2011, 7 Users following

Publications

There is a vast amount of scientific literature available online. ResearchGate enables you to search through 7 major databases and over 1,000 open access databases simultaneously by bringing together publications from PubMed, ArXiv and Citeseer, amongst others. Consequently, members have access to 45 million abstracts and tens of thousands of full texts.

Self-Archiving

Every day hundreds of researchers upload full-text publications to their ResearchGate profile and share them with their peers and the scientific community. These include published and unpublished research papers, resulting in a completely unique publication database.

The screenshot shows a ResearchGate profile for Ijad Madisch, a researcher at Massachusetts General Hospital. The profile includes a search bar, a profile picture, and statistics: 68 Impact points and 36 Publications. A featured publication is titled "Unique sequence features of the Adenovirus sequence are conserved in clinical isolates" by Soeren Hofmayer, Ijad Madisch, and Sebastian Darr, published in BMC genomics in 2009. The profile also lists academic degrees: M.D., Ph.D.

Job Board

ResearchGate currently lists over 8,000 jobs across all research disciplines. You can find international vacancies ranging from masters and PhD programs to executive and CEO positions. It's completely free to post your vacancies on ResearchGate.

Two job listings are shown: "DNA Sequencing Scientist Job - Oxford" at Source BioScience in Nottingham, United Kingdom, and "Project Coordinator Job - Medical & Population Genetics" at Broad Institute in Cambridge, MA, United States of America (USA).
